# Hotel Access Control for Back of the House

CyberLock is a scalable wireless access control system that secures back of the house areas that are vulnerable to employee theft like refrigerators, pantries, liquor rooms and linen closets. With no wiring or heavy installation, CyberLock is an affordable solution that increases security and accountability for hotels.

## Increased Key Control

- Use one key to access multiple locks
- Keys are programmed to *open specific locks during specific schedules*
- Deactivate lost keys, eliminating the need to change locks
  Receive email notifications for access events

### Audit Trail for Key Vault West Hall (ID # H00017100)
3:37:44 PM
Pacific time(US+Canada);Tijuana

| 4/3/2012 8:01:08 AM | Door Opened | |
| 4/3/2012 8:01:10 PM | Key Removed | |
| 4/3/2012 5:00:07 PM | RFID Access Card Authorized | John Taylor (089F86C7) |
| 4/3/2012 5:00: | Door Opened | |

## Increased Employee Monitoring

- *Audit record is left in key and lock* each time access is attempted
- If inventory goes missing, download audit records from lock and *see which employee gained access last*
- Receive email notifications for access events

## Reduced Employee Theft

- Only qualified staff can gain access with their assigned key
- Keys and locks contain unique ID that *cannot be duplicated*
- *Locks cannot be picked*

## Versatile

- *Over 400 different locks* to choose from including IC core, cam locks, *padlocks*, 6 pin, 7 pin, and mortise
- *Install on refrigerators, freezers, liquor cabinets, gates, closets, lockers, cabinets, storerooms and more*
- Easily move locks from one area to another

## Quick Installation

- *No wiring or power needed* to install or maintain locks
- Installation takes *less than 5 minutes a lock*
- *Retrofit your existing lock hardware*
