

INCREASE SECURITY

RETROFIT YOUR DISPLAY CASES, SAFES, AND MORE

With over 400 different versions of cylinders, CyberLock's wireless locks can retrofit and of your existing lock hardware.

MANAGE ACCESS TO ASSETS

With programmable CyberKeys you can manage what locks employees have access to and when they have access to them.

VIEW ACCESS ACTIVITY

Every time access is attempted a detailed audit trail is stored in both key and lock allowing you to track activity.

Security in the high-end retail industry is highly critical. Ensuring that every access point is secured is an absolute necessity. This can be challenging on cabinets and drawers due to the lack of hard-wired solutions for these types of access points.

CyberLock is virtually tailor made for the retail industry. With CyberLock, track every access attempt to every locking point in a store, without hard-wiring power or network cables.

CYBERLOCK SYSTEM

WIRELESS SMART LOCKS

CyberLock's wireless cylinders are pick proof and can only be accessed by authorized CyberKeys.

- 400 different locks versions
- No wiring or power needed to operate
- Stores 2,000 unique audit trails

PROGRAMMABLE SMART KEYS

CyberKeys are assigned to employees and programmed with their unique access permissions.

- Each key has unique ID
- Stores 5,000 unique audit trails
- 1 key can access multiple locks

MANAGEMENT SOFTWARE

Cloud based platform for managing CyberLock. Add personnel, view activity, disable keys, etc.

- Generate monthly audit reports
- Create custom email notifications
- Disable lost or stolen keys

VERSATILE SOLUTIONS

PREVENT DISTRACTION THEFT

Unlike mechanical locks, CyberLock cylinders have a unique, sealed design that negates standard lock picking techniques.

LOSS PREVENTION

Reduce internal revenue loss and increase accountability by scheduling and tracking all access activity.

INVENTORY ANALYTICS

Every time a CyberKey meets a CyberLock, a time-stamped access record is stored in both the lock and the key, allowing retailers to track when inventory is being accessed and how often.

KEY MANAGEMENT

Access permissions for each key can be changed effortlessly so you know what employees have access to at all times. You can also disable lost or stolen keys preventing unauthorized access.
